AVIATION

Baseline Mission Modifications

- Operator Consoles
- Observation Windows
- Equipment Stowage Racks
- Overhead Baggage Bin Removal
- Moveable Cargo Bulkhead with Crew Door
- Galley Mods and Relocation
- Crew Rest/Work Area
- Drop Hatch
- Air Operable Door
- Life Raft Launcher
- Pressurized/Unpressurized Launch Tubes
- AC and DC APU Generator Conversions
- Mission Crew Seating
- Aux Fuel System
- Max Take-off Weight Increase

Certification Basis

- TC
- FAA
- EASA
- JCAB

The Dash 8 Maritime Patrol Aircraft

The Dash 8 Maritime Patrol Aircraft (MPA) is used by multiple government agencies for Search and Rescue operations. We have over 50 Special Mission DHC-8 operating throughout the world and our customers include the coastguards of Japan, Iceland and Sweden, the Australian government, and the US Customs and Border Protection. Field Aviation has also developed intelligence, surveillance and reconnaissance (ISR), flight inspection and VIP versions of this aircraft.

In addition, Field Aviation has developed several STCs applicable to many different aircraft systems thus adding even greater versatility to this aircraft for our commercial and special mission customers. We have performed the EFI-890 glass cockpit instrumentation upgrade for many different special mission and airline operators. This state of the art upgrade STC replaces over 30 legacy components with 5 LCD displays and is certified for all -100, -200 and -300 series.
