- Color Match/Pattern Match photoluminescent floor path marking system
- Monument refinishing
- Interior panel recovering
- Economy seat refurbishment
- Overhead bin removal

VIP Interior

DHC-8 400

The FIELD AVIATION VIP Interior for the DHC-8-400 aircraft provides executive seating in the passenger cabin with luxurious seats, functional work areas and increased leg room. Economy seating can be retained in the aft cabin for a mixed class configuration, with class divider partitions providing separation between the passenger zones.

A forward VIP cabin can be created by installing club configured VIP seats in a 2-abreast (1+1) or 3-abreast (1+2) arrangement. Hi-lo conference tables or side ledges with fold-out tables are installed between the VIP seats. Hi-lo tables (without side ledges) facilitate quick change conversion between VIP/Economy configuration and standard Economy configuration.

The 16g (TSO-C127a) certified single VIP seats provide a generous 20" to 23" width between arms. The seats are upholstered in leather with swivel, recline, in-base tracking and optional leg rests.

The VIP seats can also be installed forward facing in a 2-abreast (1+1) arrangement to create a First Class cabin.
